#5200 Nut, Bolt & Washer, 840076 Spring

Mo-Clamp's Reverse Pull Clamp allows technicians to grab on to a reverse-facing weld or piece of metal and pull it out, without worrying about

whether the clamp will slip or slide. The bar has a 30% bend to allow for easier hook up. The plate can easily be flipped over to provide the reverse angle of pull, as

well. Additionally, the plate's holes are designed to allow the clamp head to swivel slightly, in either direction, to provide the technician an opportunity to get the exact angle of pull that's needed. As with all Mo-Clamp products, the Reverse Pull Clamp is covered by the Mo-Clamp "forever" warranty, is 100% USA made and comes with the backing of our 45+ years of experience in providing the tools for quick, efficient frame repair. Mo-Clamp. The original. The best.

100% Made in U.S.A.
