

#0307 90° Corner Clamp™

#0307 90° Corner Clamp

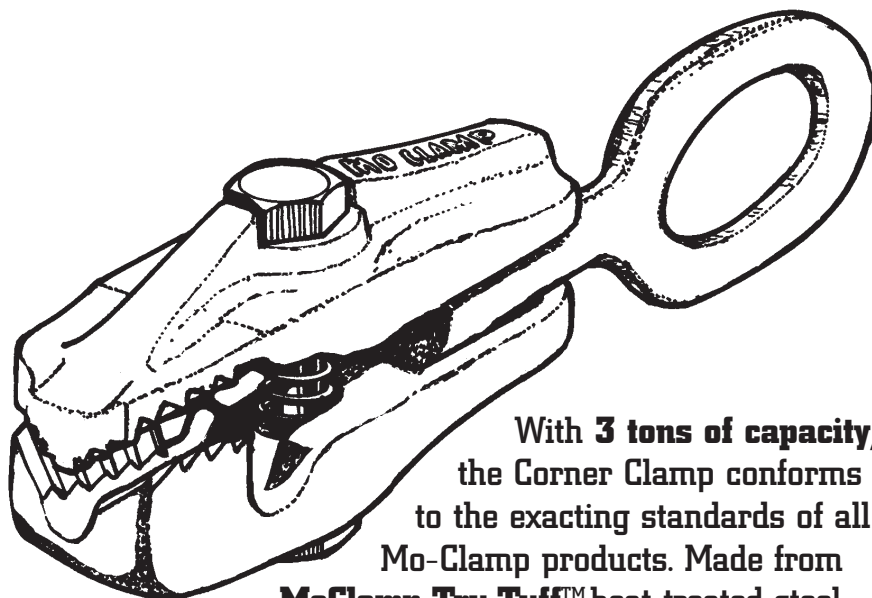

Specifications:

Overall length: 7" (178 mm)

Weight: 2.14 lbs. (.97 kg)

Capacity: 3 tons (2,722 kg)

Throat Depth: 1" (25.5 mm)

With **3 tons of capacity**, the Corner Clamp conforms to the exacting standards of all Mo-Clamp products. Made from **MoClamp Tru-Tuff™** heat-treated steel alloy, the 90° Corner Clamp uses a drop forged wedge for added strength. The cross-hatched teeth are offset to provide a firm grip for straight ahead pulls on right angle corners in the following situations:

- where core supports meet the apron
- front and rear sub frame rail assemblies on unibodies
- frame horns on full frame vehicles with an open end
- forward or backward pulls on rockers when cut to pull and realign the B-pillar

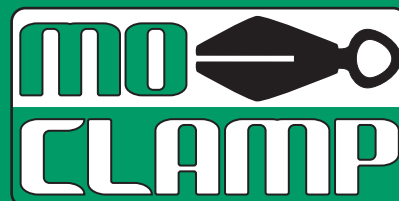

Eliminates the need to use two separate clamps and will be able to get into narrow and confined areas.

100% Made in U.S.A.
