

Tough, Flexible Protection

#6355 **MULTI-PAD**

from **mo-clamp**
Mo-Clamp®
Collision Repair Tools

The Perfect Tool For Many Jobs!

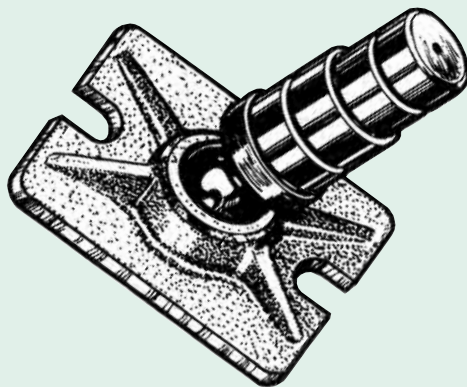

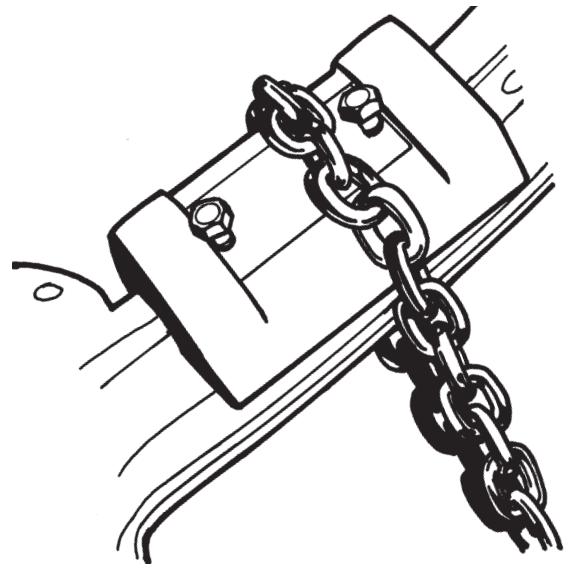

The steel plate spreads the load to prevent damage that would otherwise be caused by the chain.

Intelligent Design, Quality Materials!

Two bolts prevent the chain from sliding off as well as attaching hydraulic pushing plates.

Super Protection When Pushing!

Made of tough polyurethane that shapes itself into the surface when pushing and returns to its original shape after pressure is released.

#6356 POWER PRESS ADAPTER PLATE

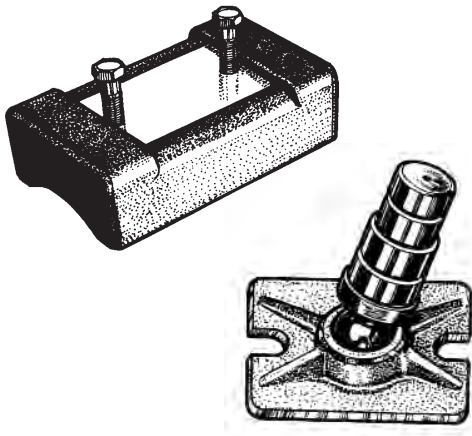

Great Accessory To The Multi-Pad!

A unique tool to fully utilize the capabilities of your portable hydraulic system! NONE OTHER LIKE IT!

- Quick set up.
- Fits almost every 4 and 10-ton portable hydraulic unit (foreign and domestic).
- Just slide your tube over the stud size that fits and push!
- Distributes the pushing forces evenly across the length and width of the Multi-Pad.
- Made from highest quality alloy steel.
- 10-ton capacity.
- Mo-Clamp lifetime warranty.
- Allows enough pressure to be exerted on flanges of door openings to maintain opening dimensions while making corrective pulls elsewhere.
